

Digi-Cool 1250 Dual Temp w/back-light

Description:

DRSA-1250 The latest evolution in diagnostic power with dual temperature sensors and back-lighting!

After what seems like an eternity, the 1250 is finally shipping! There is no reason to give up your favorite manifold, just improve it. Looking for an almost bullet proof product designed for a technician by a technician, look no further. The DRSA quickly installs on any manifold you currently own, and comes with all hardware to complete a standard installation in minutes. We stock the entire line and all accessories.

- Sleek, compact design
- Dual temperature sensors
- Back-lit display
- "Dynamic Offset" bar graph clearly shows modulation of control valves
- Adjustable digital readout update rate: 1 second, 5 second or hold digits.
- One-touch atmospheric pressure calibration.
- Vacuum readings in "Hg
- Easy to read LCD screen with large 3/8" digits.
- Temperature probe for automatic superheat and subcooling readings
- Max / min pressure monitoring for control set-up
- Automatic power off after 15 minutes preserves battery life; low battery indicator.
- Upgradeable for new and additional refrigerants
- Water resistant and wide temperature range for indoor & outdoor use
- Tough construction with flexible protective boot
- Durable construction and tough case tolerates drops and impacts
- Includes profiles for 30 common refrigerants

Benefits and Advantages

- **Quicker, more accurate diagnostics:** easily spot hidden problem using sub-psi pressure dynamics
- **Simplify cumbersome procedures:** convenience, better visibility and less frustration improves productivity and employee morale. Staff see appropriate tools and training as tokens of faith and respect from management.
- **Fewer unnecessary or inappropriate repairs:** reduce costs on current maintenance contracts, allow you to bid more aggressively for new contracts.

- **Rapid payback:** Allows you to save 10 - 15 minutes or more at many jobs. Soon the analyzer is paid for and making money for you!
- **Dual Temperature probes** allow you to analyze both sides of the system without switching around the probe or waiting for stabilization. Velcro, spring clamps and scissor clamps available.

How it Works

A set of manifold pressure gauges, it replaces the traditional analog gauges on your favorite service manifold. It shows:

- Pressure readings for the low and high sides
- Pressure fluctuations down to 1/4 psi
- Bubble and dew (or saturation) temperatures for up to **30** selectable refrigerants.

The patented bar graph display shows the smallest modulations about the digital reading. This allows unprecedented diagnostic power, as dynamics of valve modulation and refrigerant flow are easily visible to the technician

DRSA-1250 includes:

- DRSA-1250 analyzer, with 30 standard refrigerant profiles
- Velcro dual temperature probe for pipe temperature measurements
- Instruction manual
- Quick start card
- 9V alkaline battery
- Extended manifold hanging hook
- Fittings to mount to your favorite manifold
- 2 year limited warranty against defects in material and workmanship
