4. EXPLANATORY:

This site uses the cookie-based method to measure unique users. If cookies are not accepted, then the IP address & user-agent in combination based method is used to measure unique users.

Note: The Total number of Unique Users is adjusted to remove duplicate Visits by the same user. In other words, regardless of the number of times that a user visited the site, they were considered a single Unique User for the period in Par. 1a.

The Daily average represents the number of Unique Users that visited the site each day as shown in Par. 3, added together and then divided by the number of days in the period. The Mon. to Fri. and the Sat. & Sun. averages are calculated in the same manner as the Daily averages but limited to weekdays and weekends respectively.
