

An Air of Quality

AIR CURTAINS & MAKE-UP AIR SYSTEMS

- Reduce building energy costs
- Control building pressure conditions
- Repel windborne contaminants
- Improve working environments
- Protect against flying insects
- Minimize wind gust effects

One company providing many solutions

Mars Air Systems now includes the solid brand names of ARES make-up air systems, Mars Air Doors and Dynaforce air curtains manufactured all under one roof. Whether your need is to provide the comfort heating and cooling for an entire building or the necessary spot relief temperature and humidity control required in difficult work areas, look to ARES. With ARES broad line of packaged make-up air components, Mars Air Systems provides the flexibility to custom design your system to match your specific building requirements without paying for custom manufacturing!

By installing our Mars Air Doors and Dynaforce air curtains over operational doors and pass-thru windows, your building will maintain a clean, comfortable environment. Our air curtains protect your workplace environment against dust, pollen, flying insects and extreme temperature conditions.

We are continuously expanding our capabilities to provide you with a complete door-to-door, floor-to-ceiling, building air control solution.

Why Have a Building Air Control System?

LOWER ENERGY COSTS **HIGHER PRODUCTIVITY** **IMPROVED QUALITY CONTROL**

Successful companies know that providing a clean and comfortable work environment increases productivity, efficiency and quality. Every facility is unique... to gain your greatest return on investment, you need an air system that meets your specific operational, building and budgetary requirements.

As an industry leader in HVAC equipment, Mars Air Systems provides quality products to meet your design specific applications.

Make-Up Air Systems for Maximum Comfort Control

ARES complete line of make-up air systems takes building air handling and management to the next level.

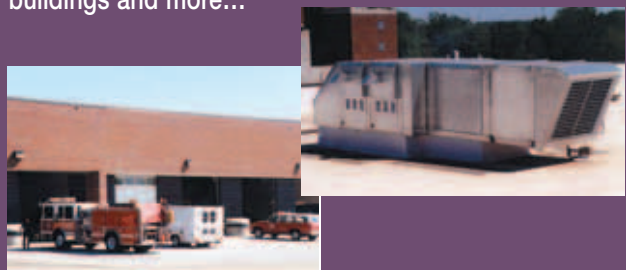

Utilizing our **Modular Components Design** approach, ARES systems economically replace large volumes of exhausted air to provide highly-efficient indoor cooling and heating.

A complete system designed on a common roof curb. ARES make-up air systems provide a fresh supply of clean air circulating through your entire workplace.

Whether controlling a building's pressure, or providing temperature or humidity relief, ARES components dramatically reduce building energy costs while creating an end-to-end comfort zone.

- Your choice of model configurations: blower units, cooling components and heating components
- Economical equipment cost
- Improves indoor air quality
- Lower operating expense
- Improve worker productivity and morale
- Ideal for manufacturing facilities, warehouses, commercial kitchens, schools, dry cleaners and office buildings and more...

Air Curtains for Working Comfort, Lower Operating Costs

15842/MAR
Buyline 5152

Mars Air Doors and Dynaforce air curtains have been designed for virtually any workplace situation. Available in a variety of styles, sizes and air flow strengths, in both heated or non-heated models, they provide a key element in our "door-to-door building solution" approach.

Our air curtains lower your energy costs and improve your working conditions.

Wind Resistance – Our heavier industrial models repel wind gusts up to 30 miles per hour, with adjustable settings to compensate for varying wind loads.

Improved Safety – Air curtains provide unobstructed entry for customers, employees and equipment, increasing safety, with better doorway visibility.

Our Air Systems at Work

Mars Air Systems air handling equipment is found "on the job" in a wide range of commercial and Industrial business environments.

Warehouses and Factories

Environmental Separation – Air curtains block cold air when you want a warmer environment in the winter, and shield your employees and equipment from hot summer air when you desire a cooler work setting. They reduce building energy costs and maintain a more comfortable, productive working environment.

Flying Insects – Air curtains repel flying insects of all types, leaving your work environment free of annoying pests, with a pesticide-free alternative for improved sanitation.

Contaminant, Dust and Pollen Control – Air curtains are especially useful in controlling dust, pollens, fumes, odors and other windborne contaminants. They are effective in meeting OSHA and other governmental regulations. We even have a HEPAC® model (High Efficiency Particulate Air Curtain) designed for clean room applications...

The "Mars Air of Quality"

The Complete System – Only Mars Air Systems delivers that unmistakable "Air of Quality" that encompasses your entire facility. From pass-thru window opening air curtains to... large loading dock models... to complete make-up air systems, we provide total solutions. Our make-up air systems control building temperature and pressure conditions. Our air curtains maintain your desired work environment. They separate inside/outside temperatures while doors are open. Our systems result in decreased energy costs, higher productivity, quality control and better employee comfort.

Customer Service and Support – Since 1962, Mars has stood proudly behind every product. Whether your needs are simply to discuss which specific make-up air components or which air curtains will work best for you, you'll always receive prompt, friendly and knowledgeable service.

Extensive Distribution Network – Mars Air Systems is a global company with knowledgeable factory trained representatives and distributors located all across the country and around the world. For the name of your local representative, please contact us.

Engineering and Manufacturing – We are proud of our talented engineering and skilled manufacturing expertise. We are readily available to discuss or help with your design specific applications or complete customization requirements. We maintain a complete library of detailed CAD drawings, product documentation, technical specifications, product application selection guides and specialized Return on Investment (ROI) software.

Call or Log On Today – To see how Mars Air Systems will help you reduce energy costs, increase productivity and improve your quality control, call today for FREE product literature or log onto our website at www.marsair.com.

Quality Assurance Guarantee

All Mars Air Systems products are manufactured using the best materials and components available. They are crafted by highly skilled, experienced tradespeople. Our products must pass stringent quality control standards. Mars Air Systems products are more durable, last longer and look better. Equally... they perform much better. For specific warranty information, please consult the factory.

Mars products meet the stringent listing or certification requirements of many organizations. The specifics vary depending on the model, options installed or application usage. Mars reserves the right to make improvements and changes to specifications without notice.
