* Check the appliance manufacturer's specifications for actual power demand. Consult a certified home generator systems professional for your exact residential power requirements.

SEREGEN 200 Series

COMPUTER CONTROLLED FOR MAXIMUM EFFICIENCY

The SEREGEN 200 Series efficiently manages the same essential and high wattage appliances as a liquid cooled standby generator nearly twice its size while using up to 50% less fuel - all for nearly half the cost.

Space-Saving Design - Compact design allows for location flexibility and lower installation costs

Exclusive Overload Protection - Advanced controls prevent generator overload due to unmanaged power demand

Smart Home Compatible - provides clean, safe power for other smart home appliances & sensitive electronics

StatStation™ - Wireless 2-way LCD performance monitor (sold separately)

Sound Shield™ Technology - Ultra quiet neighbor-friendly operation (65 dB under normal operation)

4 year limited warranty

Commercial-Grade Power

At the heart of each Rheem Home Generator System is a Briggs & Stratton Vanguard™ - one of the most powerful commercial V-Twin engines ever produced. These engines feature superior balance and low vibration for extended life, minimal maintenance, easier starting and lower noise levels - perfect for years of reliable standby power.
