

Introducing the New Smart Si thermostat

Great features. Great price.

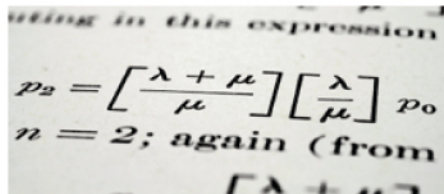

Unveiled at the 2012 AHR Expo, ecobee is proud to introduce our latest product: the Smart Si thermostat. Offering another easy, smart, energy solution for your home, the Smart Si Smart delivers the quality, innovation and great features you would expect from ecobee—all at a great price.

What makes the Smart Si so great?

Easy.

The Smart Si is Wi-Fi enabled, so you can make adjustments to your thermostat program on the go from your tablet, computer, iPhone or Smart Phone. An easy to read high-resolution color display, sleek buttons, and an intuitive user interface makes it easy to quickly set a personalized program, adjust your settings and create new vacation events whenever you need to.

Smart.

The Smart Si has a built-in live weather function and uses advanced algorithms so you can be sure your thermostat is always saving the most energy possible. (Now that's smart!) Automatic alerts and reminders notify you when your HVAC equipment is due for service, if there is an equipment malfunction or when it's time to change your filter, so you don't have to worry about it.

Green.

Did you know that setting an energy-saving program through your thermostat is one of the easiest ways to reduce your energy consumption and save money? A research study conducted by the ecobee Energy Modeling Team found that ecobee customers save an average of 26% on their annual energy costs!
