Plasma Cutting System

HVAC 520
Plasma Cutting System

These Cutting-edge machines have state-of-the-art electronics and high-speed motors for faster part production. The rigid aluminum gantry produces accurate parts with sharp corners and notches, and the quick-release magnetic torch holder allows for easy tool-free consumable changes. Equipped with Vicon ViSoft Cutting Software, the machines can cut various materials from gauge to 1/2" plate. The one-piece down draft table has an automatic CNC controlled exhaust fan that's only on during cutting, making it ideal for cutting two 10' sheets or sheets up to 22'. The machine can fully integrate with the Vicon Plasma Feeding System for greater flexibility.

Duct Lining

- Vicon's Patented Duct Lining feature is available on both machines- see our website for details
