

Comfort and efficiency that earn the highest ratings.

Today, your customers are likely to ask about how to ensure **maximum efficiency** while achieving **optimum comfort**. **ENERGY STAR® qualified** with ratings of **up to 96.7% AFUE – among the highest in the industry** – the American Standard Freedom 95 variable-speed furnace helps you address both needs. A **variable-speed blower motor with Comfort-R™** and **two-stage heating** also provide just the right amount of warmth, stepping up to the higher stage only when needed for **superior versatility and cost-effectiveness**, season after season.

Comfort features you can take to the bank.

- 1 High efficiency, variable-speed blower motor with Comfort-R™**
Slowly and quietly ramps up to speed for a softer start and more consistent airflow. When partnered with exclusive Comfort-R technology, it reduces temperature variances from room to room and provides greater humidity control during cooling.
- 2 Adaptive silicon nitride hot surface igniter**
Prevents overheating, resulting in a highly reliable ignition system and the longest possible service life.
- 3 Induced draft venting**
Variable-speed draft blower assembly quietly draws hot gases through the heat exchanger to maximize heating.

5-year limited warranty
on all functional parts

- 4 Two-stage gas valve**
Results in greater efficiency by providing just the right amount of fuel for each stage.
- 5 Self-diagnostic controls**
Complete diagnostics for easy servicing. Also includes a system fault analysis for quick gas flow shutoff, coupled with automatic ignition retry after sensing a fault mode.
- 6 Easy-access doors**
Quarter-turn dual door latches provide quick and easy access for servicing. (Upflow models only.)
- 7 Multi-port in-shot burners**
Perfectly shape the flame cone for the maximum heat possible while using less fuel. No service adjustment necessary.
- 8 Automotive-grade gaskets and insulated blower compartment**
Help reduce operating sound and air infiltration.
- 9 Primary aluminized steel heat exchanger**
Crimped, not welded, to prevent cracks from heat stress. Stamped serpentine channel offers the greatest efficiency in less space. Backed by our lifetime limited warranty.
- 10 AL29-4C™ stainless steel secondary heat exchanger**
Captures more of the heat your customers pay for. Also backed by our lifetime limited warranty.
- 11 100% fresh air option**
Uses 100% outdoor air for combustion, increasing equipment life and providing fresher air.
