CUSTOM BASES

OPTIONAL
PRESSURE TREATED
WOOD NAILER

EXTRA HEIGHT
AVAILABLE FOR
SOUND TRAPS

ALL WELDED
CONSTRUCTION

Thybar will custom fabricate a base for rooftops with special pitches or heights. These are top quality bases, yet they're still very cost effective.

FILTER BASES
AVAILABLE

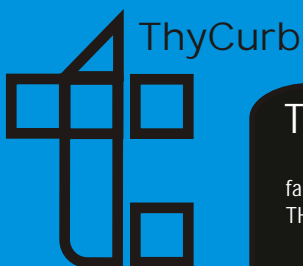

OPTIONAL
BUILT-IN
ROOF PITCH

Each Thybar custom base has all welded construction and is shipped to the site in one piece if trucking permits. Options include a built-in roof pitch, extra height, and a treated wood nailer.

TWO WEEK
DELIVERY!

SEISMIC CURBS

SEISMIC CURBS

Thybar has a complete line of laser cut, competitively priced Seismic Rooftop Curbs. Advanced laser technology offers a superior weld with the highest tolerances available. Severe wind loads or seismic activity occurs in many areas in the U.S. Thybar seismic curbs for rooftop HVACs are specifically designed to withstand these forces. Each curb is manufactured to the seismic design criteria required by geographic location.

PLENUM
PACKAGE

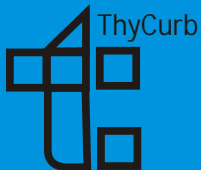

ACOUSTICAL FRAMING
PACKAGE AVAILABLE

SPRING ISOLATORS
REDUCE VIBRATION.

DEFLECTIONS OF 1", 2", OR 3"
MAY BE PROVIDED

SEISMIC VIBRO-CURB®

The Vibro-Curb® combines adjustable spring isolators and a roof curb into a single unit. Rooftop units can be set immediately after curb installation with roofing completed later without disturbing the unit. Flexible 9" flashing permits easy access to adjust isolators. Can be fabricated to match roof pitch. Duct attachment channels and/or airtight plenum available. Vibro-Curb® can ship in one piece or knocked down.
