

[www.thybar.com](http://www.thybar.com)

ThyCurb offers their customers a superior weld with the tightest tolerances available today through advanced laser technology. Their commitment to their customers is to create superior curbs with the most advanced production systems available today while keeping prices competitive.

ThyCurb has been a manufacturer of custom sheet metal products for over 45 years for the HVAC and sheet metal industries. Four locations (Illinois, Ohio, Kentucky and Texas) are fully staffed and equipped to assist in product selection, writing specifications, and confirming tight delivery schedules. ThyCurb provides state-of-the-art fabrication equipment, advanced laser technology, CAD drafting aids, plus very experienced professionals and a full line of quality roof curbs and accessories, such as:

- The patented Vibro-Curb® rooftop curb for vibration isolation applications. It incorporates adjustable spring isolators and a roof curb into a single unit. Vibro-Curbs are available in 1", 2", or 3" deflections.
- ThyCurb's seismic curbs for rooftop HVACs are specifically designed to withstand severe wind loads or seismic activity.

- ThyCurb is the leader in adapting new rooftop units to existing roof curbs with the Retro-Mate®. The Retro-Mate saves costly curb reconstruction, preserves roofing integrity, reduces system down-time, and takes advantages of existing duct work. Multi-Zone Retro-Mates are also available.
- ThyCurb manufactures a line of competitively priced laser cut, all welded construction, AZ-55 GALVALUME®, insulated metal building roof curbs.
- ThyCurb will custom fabricate a base within 2 weeks that's cost effective...and top quality!

ThyCurb is the recognized leader in pre-fabricated curbs with an outstanding reputation for product quality and state-of-the-art engineering and service. ThyCurb is focused on providing their customers with a competitive edge through improved efficiencies from advanced technology. # ThyCurb...a perfect fit!

**Forget about removal of existing curbs when replacing rooftop units.**

**ThyCurb's Retro-Mate<sup>®</sup> is custom made to adapt your existing curb to a new rooftop unit. It saves time & costly roof reconstruction, preserves roofing integrity, reduces system downtime, and takes advantage of existing duct work. Our extensive library of new and old rooftop specifications lets us design a matching Retro-Mate<sup>®</sup> without expensive field work. Reduced engineering and construction time lets you bid more competitively!**
