

Environmental System IR-SNIF-1,2,3 (Single Zone) Refrigerant Loss Monitors

World Class Infrared Refrigerant Monitors

The Environmental System IR-SNIF 1,2,3 monitors are reliable low cost “Early Warning” loss detection monitoring systems designed specifically for refrigerants.

SenTech’s IR-SNIF 1,2,3 models are cost effective, self-contained active air-draw sampling systems offering highly reliable Infrared based performance with the flexibility to satisfy a wide range of continuous monitoring applications. SenTech’s monitors utilize NDIR (Non-dispersive infrared) and pyroelectric (absorptive sensing) technology featuring a single field-programmable self-contained metal enclosure with SenTech’s unique built-in leak wait period that minimizes nuisance false alarms.

With Infrared technology, the IR-SNIF 1,2,3 (single zone) with three alarm levels is capable of monitoring and responding to any one of 20 refrigerants from a standard library via keypad entry at concentration levels as low as ten (10) parts per million (PPM).

SenTech’s IR-SNIF 1,2,3 monitors comply with ASHRAE Standard 15.

Call for additional information on the IR-SNIF 1,2,3 and SenTech other Multi-Zone monitors.
